## **FUTURE TALENTS CUP®**

EU UNDERAGE TOURNAMENT 2014-15

### **SPONSORSHIP AND ADVERTISEMENT OPPORTUNITIES**

The mission of the FUTURE TALENTS CUP (FTCup) is to help junior athletes acquire international experience, particularly in ball games.

The organisers have set themselves the task of organising annual friendly international games and sports events in various sports for interested sports clubs, that is, primarily for children participating in sports activities there. The aim is to provide young athletes with opportunities to get better prepared for future challenges in both sports and in life in general, through acquiring new, hitherto unknown experiences. Direct international experience has come to be indispensable for a successful career in any sports today and it may improve one's life and make one more successful in adulthood in all walks of life. Participation in international games also facilitates the professional activities and development of sports clubs and associations.

Owing to differences between stages of development reached by children of the same ages and to other well-known reasons not everybody has opportunities to participate in international events or even to travel abroad. Of course not everyone can be on the junior national squad and not everyone is born in favourable places and/or circumstances for a career in sports. Making progress and developing is more difficult for those living in less favourable conditions. Such challenges are also faced by sports associations.

All athletes, coaches and sports managers dream of stepping on the pitch or in the arena in iconic sports facilities or stadiums they are only familiar with through the media, or of playing against international adversaries. And when such dreams come true, the experience and the memories can never be forgotten, they linger on throughout one's life. The FTCup may provide the one of the best episodes of the sports carriers of many, something they will always remember.

The organiser of the FTCup initiative is a non-profit organisation, aiming to help making the above dreams and goals turn into reality with the help of sponsors, donors and volunteers. FTCup aims at making it possible for athletes and sports clubs to participate in the sports events it organises, partly or fully free of charge (including the costs of travelling, accommodation, meals and other auxiliary expenditures).

FTCup wishes not to provide prizes for competition and results but to contribute to participation in the spirit of FAIR PLAY (in a moral as well as financial aspect), in line with the 'one for all' motto.

FTCup opens up opportunities for junior athletes and their clubs and associations, including those who have never had a chance to participate in an international event. Indeed, it publishes data, photos and videos of the participants on its website to help them become better known on an international level.

FTCup declares its intent not to compete with any national, continental or global sports organisation, to the contrary, it wishes to cooperate with such organisations and with anyone pursuing similar goals, in order to make international participation in sports for as many children and clubs as possible. FTCup, intends to organise and support sports events in regular field football, futsal, handball, basketball, water polo and ice hockey (the list may be extended). These may be implemented gradually to ensure events repeated year after year, to provide for long term sustainability).

The expected participants of the FTCup include talented young athletes whose strong willpower, toughness and resilience may serve as a good example for younger generations and for all in general. The organisers of FTCup also wish to help young people in less fortunate circumstances, therefore they donate 10% of their annual revenues from sponsorship, to child protecting organisations.

## **FUTURE TALENTS CUP®**

EU UNDERAGE TOURNAMENT 2014-15

In the spirit of the above and based on the considerations laid out below, the organisers of FTCup wish to help all, as enabled by the available financial and other resources and they kindly request contributions from generous sponsors, donors, volunteers and sports federations to help young athletes, sports clubs, child protecting and other charity organisations.

In line with the initiative's basic concept and subject to the availability of resources, the peak of the annual sports events will be a special event over of days, taking place simultaneously with the finals of the tournaments, at venues (stadiums, sports centres) made available by the participating clubs in each of the different sports, to which all of the athletes, sports managers and clubs participating in the events of the given sport during the year, will be invited. FTCup wishes to cover the costs of the participating invitees with the help of its sponsors to enable all children and sports managers to be present and celebrate their performance of over the year together.

In addition to colourful programmes and sightseeing in the host city these events are also planned to include the finals and semi-finals of the tournaments of the various age categories, along with, as far as possible, a 'show match' with participation of adult international top athletes. These events would include the awards ceremonies with the involvement of sponsors and donors, charity organisations and other partners.

### **1. The organiser**

The tournament sport organiser is Ferencvárosi Torna Club, other tasks will be carried out by Futures Talents Cup nonprofit Kft., The incomes from sponsors and donors and the revenues from commercial activities, if any, will be used exclusively to cover the costs of the organisation, administration and operation of sports events and tournaments it organises, along with any related charity activities.

### **2. Professional supervision**

The proper, compliant implementation of sports events and tournaments is supervised by a Sports Arbitration Board (SAB) comprising prominent athletes of different sports, sports managers and experts as well as delegates of sports federations.

The organiser proceeds in obtaining the necessary authorisations and permits from international and national federations (these are subject to different regulations in the different sports). In certain sports only agents acknowledged by the relevant international sports federation (Match Agent) may organise sports events, thus any tasks and invitations required in such cases are also taken care of by the organiser.

### **3. Participants**

Only clubs invited by the organiser may participate in the tournaments, with their junior squads of the age groups selected specifically in line with the nature of the sports concerned along with their sports managers.

### **4. Implementation**

The tournaments and their matches take place in accordance with the general rules prescribed for the given age group in the given sport, supplemented by the specific rules adopted by FTCup.

The tournament series are planned to be organised each year in an Autumn – Spring terms, in one age group in each sport, with a minimum of 12 participating teams. The financial resources of the

## FUTURE TALENTS CUP®

EU UNDERAGE TOURNAMENT 2014-15

organiser may limit or enable an extension of the list of the sports concerned, the numbers of ages or teams as well as the ratio of the cost reimbursement provided by the organiser.

In line with the number of the participating clubs and their junior teams groups are formed (Annex 1). **The different age groups of the clubs participate in the same initial groups** (for cost effectiveness considerations).

Another requirement to be met as far as possible in the qualifying group rounds that **teams of the same country should not play against each other** because that would not yield new experience.

The goal of the tournament is for the players to acquire as much international experience as possible, therefore the group rounds will take place in a **single leg system (without return matches)**. Every team will play every other one in its own group (without second leg matches).

From the qualifying group rounds teams progress into the final groups according to their results.

By sport and by age group, with e.g. 12 participating teams this means 42 matches per season. This arrangement makes it possible to play 7 international matches per team, in a given season.

### 5. Final, Award ceremony, Medals, Prizes

To make the memories of the matches played last longer, simultaneously with the organisation of the matches of the finals or thereafter the organiser stages a ceremony to announce the results and to hand over awards, with the participation of all of the athletes and sports managers who had participated in the tournament up to that stage. (For many of them this may be the highlight, the most outstanding and most memorable moment of their entire careers.)

This event provides opportunities for clubs, athletes and sports managers to get to know each other better, to establish contacts and even to meet representatives of sponsors and donors.

The organisers do not intend to provide cash or other pecuniary reward or bonus for the best results (but no such offerings by sponsors are ruled out), instead, they use their funds to cover the costs of participation, for organisation, for sponsorships, documentation and for the promotion of the event as well as for increasing the number of participants and the list of sports to be sponsored.

### 6. Costs

The costs of the tournaments are made up of costs incurred in relation to the matches played between teams and those relating to the organisation of the final.

Participating clubs incur two types of costs in relation to their matches: those relating to their home games and those incurred in relation to the away games.

The organiser carried out the following calculations based on the assumption that the participating clubs have the infrastructure required for the matches and that staging the home games entails no material extra costs for them in addition to their regular operating costs.

In accordance with the organiser's request the clubs must document the home games in the form of HD video footage and digital photos. Therefore in regard to their costs relating to such documentation and other costs relating to the matches the organiser intends to provide the following cost reimbursement (unless this is provided free of charge by the tournaments Media partners).

## FUTURE TALENTS CUP®

EU UNDERAGE TOURNAMENT 2014-15

Clearly, in the case of away games clubs will incur costs of travelling, accommodation and meals. At this point, without knowledge of the final list of participants and the drawing result, the amount of such costs cannot be precisely calculated, but on the basis of past experience the organiser intends to provide the following average cost reimbursement for the participating clubs.

4 trips will be taken by a person in relation to matches (1-4 days, depending on distance), involving the participation of 1536 persons with 20-24 strong squads. (In some sports the number of individuals in the team (the travelling squad) is 10-20 percent smaller, resulting in a nearly proportionate cost reduction in the given cost item).

Costs of group matches	Average cost/match	Matches	Total cost (EUR)
Home team, Away team, Organization, Documentation, Statistical analysis, etc.	6 000	30	180 000

Costs of Final ceremony	#	Average cost/person	Total cost (EUR)
Teams	12		100 800
Squad/Team	24		
Total (invitation)	288	350	
Organization, rent, fees, etc.		100 000	100 000

Accordingly, the total cost of a tournament in a given sport amounts to about EUR 380,800. This required amount may, of course, be lower, if the partners FTCup and the participating clubs provide assistance in the form of discounts and other allowances and/or in kind contributions (accommodations, meals, air tickets, bus rentals, fuel, insurance, media, telecommunication etc.), and/or if participants can, depending on their individual capacities, undertake to pay part or the whole of their costs of participation.

### 7. Revenues, Recovery of costs

The organiser intends to cover the costs remaining after the above cost cutting possibilities with the help of sponsors, supporters, donors and other partners, from its commercial and other revenues (the following is a list some of the possibilities).

Support or sponsorship may come in the form of financial, in kind or other offerings (in addition to the costs of organisation and implementation, concerning the awards and rewards for the participants etc.).

The organiser undertakes to offer 10% of its income from sponsorship to charity organisations therefore sponsors can not only provide support but they can indirectly also contribute to charity objectives. The fulfilment of this undertaking also means that the revenues need to exceed the above costs relating to the organisation of the tournament by the approximate amount offered for charity objectives.

The tournaments will entail a number of good catchwords (including child, future, talent, charity etc.) and the events make it possible to access such potential consumer target groups that may inspire any economic or social participant for the purposes of sponsorship, partnership, advertisement or for other goals.

## FUTURE TALENTS CUP®

EU UNDERAGE TOURNAMENT 2014-15

### 7.1. Ticket and season ticket revenues

The following tables show the potential ticket revenues based on spectator numbers and ticket prices in the quarterfinals.

Per sport	Ticket price (EUR/person)				
	5	15	25	35	45
For the 12 matches of the finals					
Paying spectators (number of persons)	Revenue (EUR)				
40 000	200 000	600 000	1 000 000	1 400 000	1 800 000
30 000	150 000	450 000	750 000	1 050 000	1 350 000
20 000	100 000	300 000	500 000	700 000	900 000
10 000	50 000	150 000	250 000	350 000	450 000

The 12+12 teams of the age group play a total of 12 matches in the finals, thus the 'Paying spectators' and the 'Ticket price' apply to the 12 matches (that is, 12 matches x 1,000 spectators x 25 EUR/person = 300 000 EUR, or for example 12 matches x 5 EUR/person x 4 000 persons = 240 000 EUR)

Sponsorship or support may take the form of ticket purchase as well (in which case the organiser's effective revenue equals the net ticket price) thus the sponsors and donors may further utilise the tickets in the framework of their own promotional activities (thereby boosting the number of spectators and further popularise the tournament). This may apply not only to the finals but also to the group matches, which may facilitate an increase in the revenues of the junior clubs and indirectly reduce the contribution payable by the organiser.

### 7.2. Sponsorship by selling products

One possible way to promote FTCup and expand the range of sponsorship may be presentation of the FTCup logo, a brief description of the initiative and the name of its charity partner on the packaging of the products distributed by our sponsors and partners.

Consumers' attention would be drawn to the fact that the products purchased under the arrangement would cost a few Euro cents more than the regular prices and that buy their conscious decisions to buy the products concerned consumers can support FTCup and its charity partner (the surcharge may, subject to the different countries' own taxation rules, be VAT-exempt income and contribution).

In this form the partners participate exclusively in the collection, registration and transmitting of their contributions to the organiser, while at the same time the sponsorship of the initiative would contribute to promoting their positive image (trips to the finals may be allocated to the purchasers of such products through drawing lots based on registration (e.g. by sending the code on the purchase receipts in a text message to a toll-free phone number).

The effectiveness of fund raising by FTCup for such charity purposes could be boosted by media partners through for example free advertisement appearances (which, in turn, could provide free advertisement opportunities for the above product distributor partners).

Such agreements with the partners may also involve partners' supplementing the amounts received as described above, from the sales of their products (e.g. in regard to the free media appearances).

Such campaigns could be continued throughout the year, e.g. by selling products featuring for instance 'FTCup – UNICEF' (fast food menus, soft drinks, chocolates, video games etc.). Assuming

## FUTURE TALENTS CUP®

EU UNDERAGE TOURNAMENT 2014-15

an average of 0.25 EUR surcharge and a like amount of supplementary contribution by the partners concerned, it may be possible to cover the approx. EUR 786,600 cost per sport by selling about 1.573 million units of products, or by selling an average of 4,310 products per day.

The population of Europe is about 750 million, consuming more than the above numbers of units of the products of a number of brands. Moreover, there are quite a number of business organisations operating about as many points of sales in Europe as the above number of units of products to be sold each day (in other words, it would be enough for each them to sell 1-2 products with the EUR 0.25 contribution each day) and there are a lot of manufacturers and distributors selling many times more units of products per day than the numbers outlined above (i.e. they can cover the above costs even with surcharges below EUR 0.01 per unit of product).

### 7.3. State, local governmental participation

24-24-strong squads of one age group of 12 teams would be invited to the finals, involving the participation of a total of 288 persons. At least 432 additional foreign guests – from their respective networks of relationships, along with delegates of the tournament's sponsors and donors and individuals involved in promotional campaigns associated with their ticket purchases – as a consequence of which the total number of foreign participants is estimated to be a minimum of 720 persons. In the case of a 4-day event this adds up to a total of 2,880 guest-nights.

According to data released by the Central Statistics Office (CSO) foreign visitors in Hungary spend an average amount of 45-105 EUR/person/day, depending on the purpose of the trip. Assuming an average amount of spending – as a conservative average of the above range – an amount of 75 EUR/person/day may be expected to be spent by such visitors, at least half of which is the cost of accommodation (in the case of the Formula One events the officially calculated amount of spending is 275 EUR/person/day).

Accordingly, participants would spend EUR 216,000 in the organising country during a 4-day event. According to analyses and surveys on tourism about 40% of the visitors return to the destination as a result of the experience (in the case of sports events and entertainment programmes this may be a lot higher percentage rate, e.g. in the case of the Formula One races the rate of those returning to the destination is up to 80%).

Accordingly, a conservative calculation indicates the returning of some 288 persons, entailing the spending of another EUR 86,400 in the case of a 4-day average stay. Accordingly, the total overall spending would amount to EUR 302,400.

The total rate of direct and indirect revenue from taxes, duties and contributions resulting from the above spending is, on the basis of the Hungarian tax rates, 48.46% (in view of the statistics applying to Formula One events), adding up to an EUR 104,674 state and local governmental revenue in the given year, or a total of EUR 146,543 including the spending of returning visitors.

It should be noted that the organisation of such a tournament and the implementation of the finals in the various sports has an enormous PR value. Thus in addition to the tax, duty and contribution revenues, the advertisements through the network of relationships involving some 100,000 persons per sport, or even through accessing millions of persons through the media, can generate additional extremely important country image promotion and renown (which may even be an important aspect in the course of endeavours to organise future world or European sports events, including additional positive spill-over effects).

## FUTURE TALENTS CUP®

EU UNDERAGE TOURNAMENT 2014-15

Clearly the FTCup cannot, for the time being, be compared to the popularity of the Hungarian Formula One event, but even if the initiative succeeds in achieving an effect equalling 1% of the country advertisement generated by the Formula One event, this would correspond to some EUR 250,000 worth of country promotion per year (in comparison to the Formula One, on the basis of the ratio of expected foreign visitors, an initial 2-3 percent ratio is a realistic expectation initially, which would correspond to country promotion worth some EUR 500,000-750,000.)

The matches organised with the involvement of well-known international clubs (in which their adult stars may also appear) and other events associated with the finals will attract additional domestic and international audience. This may generate additional tax, contribution and duty revenues through further spending on goods and services which may add up to a 3-4 time increase in the above figures (spending of up to EUR 0,7-1.2 million, with EUR 0.34-0.6 million revenues from taxes, revenues and duties).

	Number of invitees and other foreign participants			
Average spending during the stay	<b>720 persons</b>	<b>1 800 persons</b>	<b>2 520 persons</b>	<b>7 560 persons</b>
<b>300 EUR</b>	216 000 EUR	540 000 EUR	756 000 EUR	2 268 000 EUR
Rate of taxes, contributions and duties	Revenue from taxes, contributions and duties			
48,46%	104 674 EUR	261 684 EUR	366 358 EUR	1 099 073 EUR

This may be easily accomplished even if the spending of the originally calculated number of participants comes closer to the level recorded in the case of the Formula One events (e.g. in the case of an international all-stars match a higher propensity to spend may be targeted).

The above two impacts together may generate spending of up to approx. EUR 3.5 million with tax and similar revenues of up to about EUR 1.7 million.

It may be concluded from the above that state and local governmental subsidies for even the entire tournament series but particularly the finals, is a highly lucrative investment, even if these are implemented solely from state sponsorship (this applies to each of the different sports). The above calculations are confirmed by statistics relating to the Sziget Fesztivál (Island Festival).

### 7.4. Possible revenues from media contents, utilisation of sponsorship

Video recording of the matches during the tournament makes it possible to sell media contents and highlights derived from them.

The following is an illustration of the potentials on the basis of the example of a football tournament of 12 teams, one age group, in 7 rounds, with a total of 42 matches.

	Matches	Highlights	
Matches/highlights	42	6	units
Programme time to be sold (with commercial)	70	5.5	hours
Commercial time/event	10	10	minutes
Total commercial time	420	60	minutes
Commercial time broken down into 15 second spot blocks	1 680	240	units/15 sec
Repeated broadcast	1	10	units

## FUTURE TALENTS CUP®

EU UNDERAGE TOURNAMENT 2014-15

Total number of appearance of commercial blocks	1 680	240	units
Value of commercial block/unit	50	50	EUR/15 sec
Possible advertisement revenue/TV channel (country)	84 000	120 000	EUR
TV channel (Country)	11	11	units
<b>Total commercial broadcast value</b>	<b>924 000</b>	<b>1 320 000</b>	<b>EUR</b>

Planned cost of football tournament	786 600	786 600	EUR
<b>Minimum commercial block value required for organisation</b>	<b>42,56</b>	<b>29,79</b>	<b>EUR/15 sec</b>

Value of broadcast right	2 800	2 800	EUR/hour
Repeated broadcast	1	6	units
Value of broadcast right	196 000	92 400	EUR
TV channel (Country)	11	11	units
<b>Total broadcast time value</b>	<b>2 156 000</b>	<b>1 016 400</b>	<b>EUR</b>

It is clear from the above tables that the costs of the organisation of the football tournament can even be covered by selling the rights to broadcast the matches and the highlights.

It is also clear that the value of the relevant commercial/advertisement potentials could amply cover the value of the calculated media rights and the costs of organisation (even if lower than the above, already depressed prices, or other lower rates and figures are applied eventually).

Clearly, the amount spent on advertisement broadcasts (sponsorship) would also be recovered (or would remain way below the customary levels) even if the contents were to be broadcast in significantly fewer countries and/or substantially fewer times than indicated above.

In addition to the interest of media enterprises this could quasi mean that media broadcasts could also take place through preparing a programme from the recorded and processed video content produced from the tournament organised with the support of sponsors, supplemented with the sponsors' advertisements, and then it is transferred to media for broadcasting at very low prices or even free of charge. Thus the sponsors' advertisements could be broadcast at rates significantly below the customary prices (or the tournament could be organised with the involvement of different sports, with wider participation for a broader audience).

Another form of the utilisation of sponsorship involves the FTCup website and indirectly those of the participating clubs.

Accordingly, the amount spent on sponsorship may even be regarded as an amount spent on purchasing commercial time or other media appearance, i.e. the sponsor would not only provide support for the event and charity purposes but at the same time it would also advertise and promote itself.

The advertisements may be of a commercial type, promote tourism or disseminate information, making it possible for the contributions of such state or local governmental sponsors to be recovered who can promote or enhance the knowledge and popularity of their own countries or home-towns (e.g. country image).

### 7.5. Other commercial revenues

In addition to the above, video and photo documentations and statistics derived from their analyses can also be utilised and published (selling educational materials, statistics etc.).

## **FUTURE TALENTS CUP®**

EU UNDERAGE TOURNAMENT 2014-15

Further sources of revenues may include the sale of marketing and other media rights, memorabilia, images, music, or similar items and services.

In the current phase of organisation it is difficult to quantify the above but the organiser is determined to make sure that the initiative develops into a valuable and appreciated brand of its own.

Of course owing to non-profit oriented operation and the legal form of the undertaking these revenues – together with all of the other types of revenues – would be used exclusively for the organisation and implementation of sports events and for charity purposes (by increasing the number of sports, age groups and participants).

### **7.6. Subsidy through tax allowance (Corporate income tax)**

Provisions on the tax allowances for the sponsoring of spectator and team sports are laid down in regard to enterprises registered in Hungary in Act LXXXI of 1996 on corporate income tax and dividend tax, according to which the corporate income tax may be reduced by the ratio specified in the Corporate Income Tax Act.

According to Government Decree 107/2011. (VI.30.) and Government Decree 134/2013.(V.9.) the tax allowance is available if the sports development programme of the sports organisation intended to be sponsored has been approved by the competent sports federation and the sports development sponsorship has been paid on the basis of the agreement between the sports organisation and the sponsor, and a sponsorship certificate has been made out accordingly.

In our case this means that in the case of this type of sponsorship the sponsor concludes the relevant agreement with Ferencvárosi Torna Club Zrt., that is the organising partner of FTCup, in relation to the sponsoring of its junior division, on the basis of which it receives the certificate required for the availability of the tax allowance.

Accordingly, the sponsor would use an amount it would have to pay in tax anyway, for sponsoring the junior tournament. This will entail no extra cost for the sponsor, indeed, it may – as described above – even result in free advertisement and media appearance.

## **8. Sponsors, supporters, advertisers and donors**

Accordingly, contributions to and assistance for the initiative may be expected from a wide range of social and economic participants (based on professional or other considerations), and not only in the form of financial contributions but also by way of networking, charity activities etc., including the involvement of sports clubs, federations, high profile athletes, public figures, businesses etc.

We sincerely hope that you will find this initiative interesting and we can soon welcome you among our sponsors and supporters so that together we can help children and contribute to a better future.
